

Save Money & Time

WITH OUR ON-SITE FUEL STORAGE SOLUTION

Fuel Storage Tanks - The Right Choice For Your Fleet

Many companies with a fleet of vehicles still use off-site refuelling facilities. But this can result in higher costs and wasted time.

Fuelco provides fuel storage solutions and support service that could tip the scales towards the efficiency and ease of having on-site refuelling services.

We take care of environmental compliance requirements that surround storing and dispensing fuel.

Our fuel tanks compliant to global standards, are easily transportable and require minimum civil construction for installation.

Having bulk fuel stored also cushions price spikes, plus gives better control of what goes into your fleet.

Benefits Of On-Site Fuel Storage Facility vs Fuel Card

Saves money

- Reduced fuel expenses
- Savings on drivers commute costs and time
- Saving in administration, fuel cards & other fees

Fuel monitoring & reporting

- Examine the performance of your fleet's vehicles and drivers
- Understand your cost per mileage figures
- Discover which vehicles are performing on, above and below the expected MPG target
- Access the means to monitor and make improvements
- Predict future expenses more easily, giving you a better handle on your finances
