Diesel Fuel Transfer Skid - with a rated capacity of 500 l/min

Capable of down-loading, uploading and circulating Diesel fuel at 500 l/min without the need of disconnection or reconnection of site hoses.

Optional capability of refuelling into light vehicles.

All built onto a heavy duty skid frame with crane lifting points and intergrated drip & spill tray.

Coated with a marine grade heavy duty paint system.

- Atex and UL Certified Market leading Fuel Pump
- Yanmar Diesel Engines fitted with Spark Arrestors
- TCS700-25 Trade Certified Flow Meter
- Fire Proof Flanged Ball Valves
- Zone 1 or 2 (model specific) Certified Flame Proof Electric Motor
- Inline Strainer to protect the pump
- Internal and External Pressure relief valves to protect the system against over-pressurization and pump overload
- Pressure and Compound Gauges to indicate system functions
- 80nb Cam-lock connections
