

Everlink Solar powered Auto Tank Gauging

Not only Fuel but can also monitor water tanks at farms

Everlink ATG is our range of automatic tank gauging products, commonly known as auto-dips. They connect to our cloud based Everlink management software to enable easy tracking of tank levels. The solar unit mounts directly to a socket or can be screwed to the top of a tank.

Features include:

- Solar powered direct tank top mounting.
- Supplied with a range of reducers for quick mounting.
- Multiple sensing technologies available to suit different environments and different fluids such as Adblue®.
- Custom tank sensing depths available from 1 to 30 metres.
- Updates on level movement, and hourly providing live feedback of the tank level.
- Standard lead acid battery in solar unit, safe and inexpensive to replace.
- 3G, 4G, 5G and CATM communication options provide optimum coverage reach.
- 316 stainless steel and UV resistant ABS construction.
- Supports dual tanks, halves the cost! Eg: Diesel and Adblue®
- Email and SMS alerts for overfill, delivery level and low level .
- Daily tank level email reports.
- Fuel supplier access to tank level data .
