

Fire Rated Containerised Tanks

- Fire Rated double-wall fire-protected aboveground storage tank
- Inner and outer steel tank with a unique lightweight thermal insulation material that exceeds the 2-hour fire test
- Insulating material is 75% lighter than concrete, reducing shipping, installation and relocation costs
- Compatible with a wide range of Fuels and Chemicals, Including Biodiesel and Ethanol
- AS1692, UL142, ULC S601, UL2085, CSC, AS1940

Tank Features

- UL 2085 Listed “Protected” tank
- Ballistics and Impact protection per UL 2085
- Both the inner and outer steel tanks are built to UL standards
- Dual compartment tank can be used for multiple products eg. diesel, gasoline etc
- Tank constructed with thermal insulation material on all sides that fully surrounds the product
- Insulates product in tank from ambient temperature variations, reducing emissions to the environment
- Steel outer wall provides low cost maintenance and protection from weathering
- Primary storage tank and secondary containment compatible with a wide range of fuels and chemicals, including biodiesel and ethanol
- Interstitial space can be monitored for leak detection

Additional Features

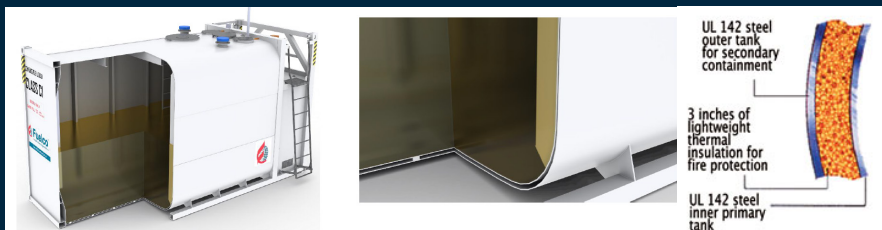

- Steel Construction | Customisation as required | Built to Internationally recognised Standards with strict third party quality control inspection program
- Can have ULP dispensing at tank

Fire Rated Containerised Tanks

To meet UL2085 the requirement is for 3 inches or 75mm of insulation for 2 Hr and 6inch or 152mm for 4 Hr, on all faces of the tank, including the roof and floor.

This is sandwiched between the inner and outer skins.
